

PRACTICE MANAGEMENT FOR SMALL LAW FIRMS

**Built by a practicing attorney.**  
*Priced for the firm you actually  
run.*

One flat rate. Unlimited users. Client onboarding, billing, trust accounting, e-discovery and AI-assisted drafting — in one place, without the per-seat tax.

**\$29.99** per firm, per month **unlimited**  
**users • no per-seat tax**

THE PROBLEM

# Legal software charges you a tax on every person you hire.

The incumbents price per user, per month. Add a paralegal, add an attorney, bring on an assistant — and the bill climbs with every seat. The tools meant to help you grow quietly punish you for growing.

Published per-user list pricing at a working tier (Clio Essentials), annual billing, as of June 2026.

## THE PRICING MODEL

# Per-firm. Not per-seat.

Lawmighty charges one flat price for the whole firm — with unlimited users. That single difference is the entire story.

### THE INCUMBENTS

**\$49 – \$149** / user / mo

× every seat, × 12 months

### LAWMIGHTY

**\$29.99** / firm / mo

Unlimited users. One price. No tiers.

WHAT IT ACTUALLY COSTS

# The bill, per year

On per-seat pricing, every hire multiplies the bill. **On Lawmighty, the number never moves.**

A 5-person firm saves roughly \$4,000–\$5,000 a year — and keeps every dollar of it as they grow.

FEATURE FOR FEATURE

# Everything's in the box.

No tiers. No add-ons for the things you actually need. One price unlocks the whole platform.

## Matter & client management

Every client, case, deadline and document in one organized place.

## Time, billing & invoicing

Log time, generate invoices and track A/R without a separate billing tool.

## Trust / IOLTA accounting

Compliant client-funds ledgers with running balances — in the base price.

## AI discovery & drafting

Interrogatories, RFPs and case summaries drafted in-workflow — not upsold.

## Client portal

A branded space where clients complete intake, forms and shared documents.

## Family-law depth

Child-support calc, parenting plans and juvenile forms that ship working.

CLIENT MANAGEMENT

# Your whole caseload, at a glance.

Every client file — status, contact, and when it opened — in one searchable list. Open any matter to jump straight to time, billing, trust and discovery.

- ✓ Search by name, email or username
- ✓ Active and closed files, always separated
- ✓ One click into the full matter workspace

BILLING & TRUST

Get paid — and stay compliant.

Amount billed, outstanding A/R and available credit on one tab. Client funds live in a proper IOLTA trust ledger with running balances — no separate accounting product, no extra tier.

AI, BUILT INTO THE WORKFLOW

A core feature — not a premium upsell.

Generate an AI case summary of everything a client entered — budget, assets, discovery answers, documents — with cross-module inconsistencies flagged. Draft correspondence and discovery straight from the file.

- ✦ **AI case summary**  
One digest of the whole file, inconsistencies flagged.
- ✦ **Discovery drafting & extraction**  
Interrogatories and RFPs generated in-workflow.
- ✦ **Billed per use, at minimal cost**  
No AI tier tax — pay only for what you generate.

### Default Permissions

These are the default permissions applied when a new attorney or staff member is added. Per-user permissions can be customized individually from each profile in **Staff Management**. Owner permissions are fixed and cannot be changed.

Owner — Always has full access to everything. Cannot be restricted.

| PERMISSION                                                                                                                                                                       | ATTORNEY                                    | ACCOUNTING                                  | STAFF                                       |

Off for all staff by default — owners can always purchase | <input type="checkbox"/> Denied             | <input type="checkbox"/> Denied             | <input type="checkbox"/> Denied             |

ROLES & PERMISSIONS

Bring on your whole team — safely.

Because users are unlimited, everyone belongs in the system: attorneys, accounting, staff. Granular per-role permissions decide who sees billing, runs discovery, or manages trust. Owners always keep full control.

Add staff without adding cost — so there's no reason to leave anyone out.

## MOVING OVER

# Switch in a click — and we'll tell you the truth about the rest.

One-click Clio import brings your matters, contacts and activities across. And we're honest about what's still being built.

### READY TODAY

- ✓ One-click Clio data import
- ✓ Conflict checker & contacts import
- ✓ Document generation from templates
- ✓ E-signature inside modules (e.g. retainers)
- ✓ Fully responsive on every device

### ON THE ROADMAP

- LawPay built-in payments
- Native iOS & Android apps
- E-signature everywhere, firm-wide
- Direct imports from MyCase & others
- Community template marketplace

# Stop paying a tax on every person you hire.

Built by a practicing attorney, for the small firms who actually need it. Be among the first firms in.
